

# Is Your Medical Practice ready for Speech Recognition?

- How is your practice doing financially?
- Want to reduce the time physicians spend typing or using transcription?
- How can you provide the best service to both patients and referring physicians?
- Is your staff workflow as productive as it could be?
- Are the physicians in this practice happy or frustrated with the current process for documenting care?
- How can you integrate your PACS with your EHR improve workflow?
- How can you achieve meaningful use?
- How can you maximize your ability to provide care while still maintaining regulatory compliance for HIPAA and the Electronic Medical Records Mandate?

*Dragon® Medical Practice Edition was created especially for physician practices and clinics with 24 physicians or less to create transcription-free clinical documentation, reduce time spent documenting care and optimize EHR and PACS integration for healthcare providers.*

To date, Dragon® Medical Practice Edition has been selected by more than 180,000 physicians to **provide more efficient, profitable and effective care**. FreedomPACS® can help you integrate digital dictation and transcription into our HIPAA-compliant web-based PACS solution to improve workflow and productivity in your practice.

## Benefits of using Dragon® Medical Practice Edition

**Reduce time spent documenting care** & shorten document turnaround time

**Eliminate thousands of dollars** of annual transcription costs per physician

**Improve patient care** with 99% accuracy so you can tell the complete patient story

**Fast ROI** - Most physicians recover their costs in less than three months

**Increase productivity** by accelerating navigation within your PACS or EMR with real-time dictation
